

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended)        A device configured to receive an electronic program guide, said electronic program guide comprising:  
                                 a channel list of available channels; and  
                                 a program list of programs which is displayed concurrently with said channel list in response to selection of a selected channel from said available channels, said programs being exclusively associated with said selected channel,  
wherein said device comprises:

a processor for processing said electronic program guide and for causing said device to display said electronic program guide; and

a controller for controlling said device and said processor, said controller having accessing means for causing said processor to access said electronic program guide, and for controlling said processor to cause said device to display only said channel list of said electronic program guide in response to an initial activation of said electronic program guide by said accessing means, and wherein said accessing means subsequently controls said processor to cause said device to display both said channel list and said program list ~~are provided~~ in response to said accessing means accessing said programs list.

2. (Cancelled).

3. (Previously Presented) The device as claimed in claim 1, wherein said program list includes times associated with said programs and/or an identifier, said identifier including a current time and/or said selected channel.

4. (Previously Presented) The device as claimed in claim 1, wherein said electronic program guide further comprises an information list displayed concurrently with said channel list and said program list, said information list including data associated with said selected program, said data including description, rating and/or repeat indication of said selected program.

5. (Previously Presented) The device as claimed in claim 4, wherein said information list is displayed in response to said controller selecting a selected program from said programs, or in response to activation of an open switch while a cursor highlights said selected program.

6. (Previously Presented) The device as claimed in claim 1, wherein said program list includes a reminder switch configured to set reminders for said programs, and/or a theme switch configured to open a theme menu, said theme menu including information categorized by themes for said available channels and/or said selected channel.

7. (Previously Presented) The device as claimed in claim 1, wherein said device further comprises an interface for navigating through said electronic program guide, said interface including at least one of:

an open switch configured to open menus including said program list;

a close switch configured to close menus including said channel list and said program list; and

a help switch configured to open a help menu, said help menu including help information related to use of said guide and/or a controller of said electronic program guide.

8. (Previously Presented) The device as claimed in claim 7, wherein said controller is a remote controller.

9. (Previously Presented) The device as claimed in claim 7, wherein said accessing means includes a switch to access said electronic program guide, an up switch; and a down switch; said up switch and said down switch being configured to respectively scroll a cursor up and down said channel list and/or said program list.

10. (Previously Presented) The device as claimed in claim 9, wherein said up switch and said down switch are configured to scroll by pages.

11. (Previously Presented) The device as claimed in claim 9, wherein said up switch and said down switch are configured to respectively move said cursor to a top or a bottom of said channel list and/or said program list and thereafter scroll by pages.

12. (Previously Presented) The device as claimed in claim 9, wherein said up switch and said down switch are respectively configured to singularly move said cursor up and down entries of said channel list and/or said program list.

13. (Previously Presented) The device as claimed in claim 7, wherein said controller includes a right switch and a left switch configured to move said cursor between said channel list and said program list.

14. (Cancelled).

15. (Currently Amended) A controller for controlling an on-screen display of an electronic program guide, said controller comprising an access switch for accessing said electronic program guide, and navigation switches for navigating through said electronic program guide, said electronic program guide comprising:  
a channel list of available channels; and  
a program list of programs which is displayed concurrently with said channel list in response to selection of a selected

channel from said available channels, said programs being exclusively associated with said selected channel, wherein only said channel list is provided in response to a first activation of said access switch, and both said channel list and said program list are provided in response to a second activation of said access switch, or in response to activation of a program switch of said controller subsequent to said first activation of said access switch.

16. (Cancelled).

17. (Currently Amended) A processor programmed to operate a display monitor, said processor being configured to perform the acts of:

receiving an electronic program guide;

displaying a channel list of available channels; and

displaying a program list of programs concurrently with said channel list in response to selection of a selected channel from said available channels, said programs being exclusively associated with said selected channel,

wherein only said channel list is provided in response to an initial accessing of said electronic program guide, and subsequent to said initial accessing of said electronic program guide, both said channel list and said program list are provided in response to accessing said programs list.

18. (Currently Amended) A method of navigating an electronic program guide comprising the act of:

displaying a channel list of available channels; and

displaying a program list of programs concurrently with said channel list in response to selection of a selected channel from said available channels, said programs being exclusively associated with said selected channel,

wherein only said channel list is provided in response to initially accessing said electronic program guide, and both said channel list and said program list are provided in response to subsequently accessing said programs list.
